

AT A GLANCE: BBSRC FORWARD LOOK FOR UK BIOSCIENCE

BBSRC's Forward Look is structured around three high-level objectives, and eight Research and Innovation Priorities:

Advancing the frontiers of bioscience discovery		
<p>Understanding the Rules of Life Promoting creative, curiosity-driven frontier bioscience to address fundamental questions in biology.</p>	<p>Transformative Technologies Developing the tools, technologies and approaches that enable researchers to push the boundaries of scientific discovery and stimulate innovation.</p>	
Tackling Strategic Challenges		
<p>Bioscience for sustainable agriculture and food Delivering more productive, healthy, resilient and sustainable agriculture and food systems.</p>	<p>Bioscience for renewable resources and clean growth Transforming industries through bio-based processes and products in a new low-carbon bioeconomy.</p>	<p>Bioscience for an integrated understanding of health Improving animal and human health and wellbeing across the life course.</p>
Building Strong Foundations		
<p>People and talent Attracting and developing a flexible and diverse workforce for modern bioscience</p>	<p>Infrastructure Ensuring that the UK bioscience community has access to the facilities, resources and services necessary to carry out ground-breaking research, and to support its translation into economic and societal impact</p>	<p>Collaboration, partnerships and knowledge exchange Enabling collaborations across disciplines and sectors, with the users of research, and nationally and internationally</p>
